

SCOTLAND
THE BIG PICTURE

Lock away carbon and boost nature

Welcome to Rewilding Experiences!

We very much hope you enjoy your time with us.

SCOTLAND: The Big Picture is a charity that works to drive the recovery of nature across Scotland through rewilding, in response to the growing climate and biodiversity crises.

Despite our commitment to sustainability, we recognise that operating travel experiences has an impact on our environment. We take this responsibility seriously and ask that you join us and consider the climate impact of your own journey to be with us.

Help to lock away carbon and boost nature

Hello!

Climate change is knocking on Scotland's door. The first and most valuable contribution we can all make is to reduce our carbon footprint. Investing in rewilding is an additional mechanism to lock away the carbon created through your travel.

By expanding and restoring a rich tapestry of native woodlands, wetlands, wildflower meadows and grasslands, rewilding is an effective way of capturing carbon and returning wildlife to our landscapes. Rewilding also helps people by cleaning air and water, reducing the risk of flooding and drought, and providing space for outdoor learning and recreation.

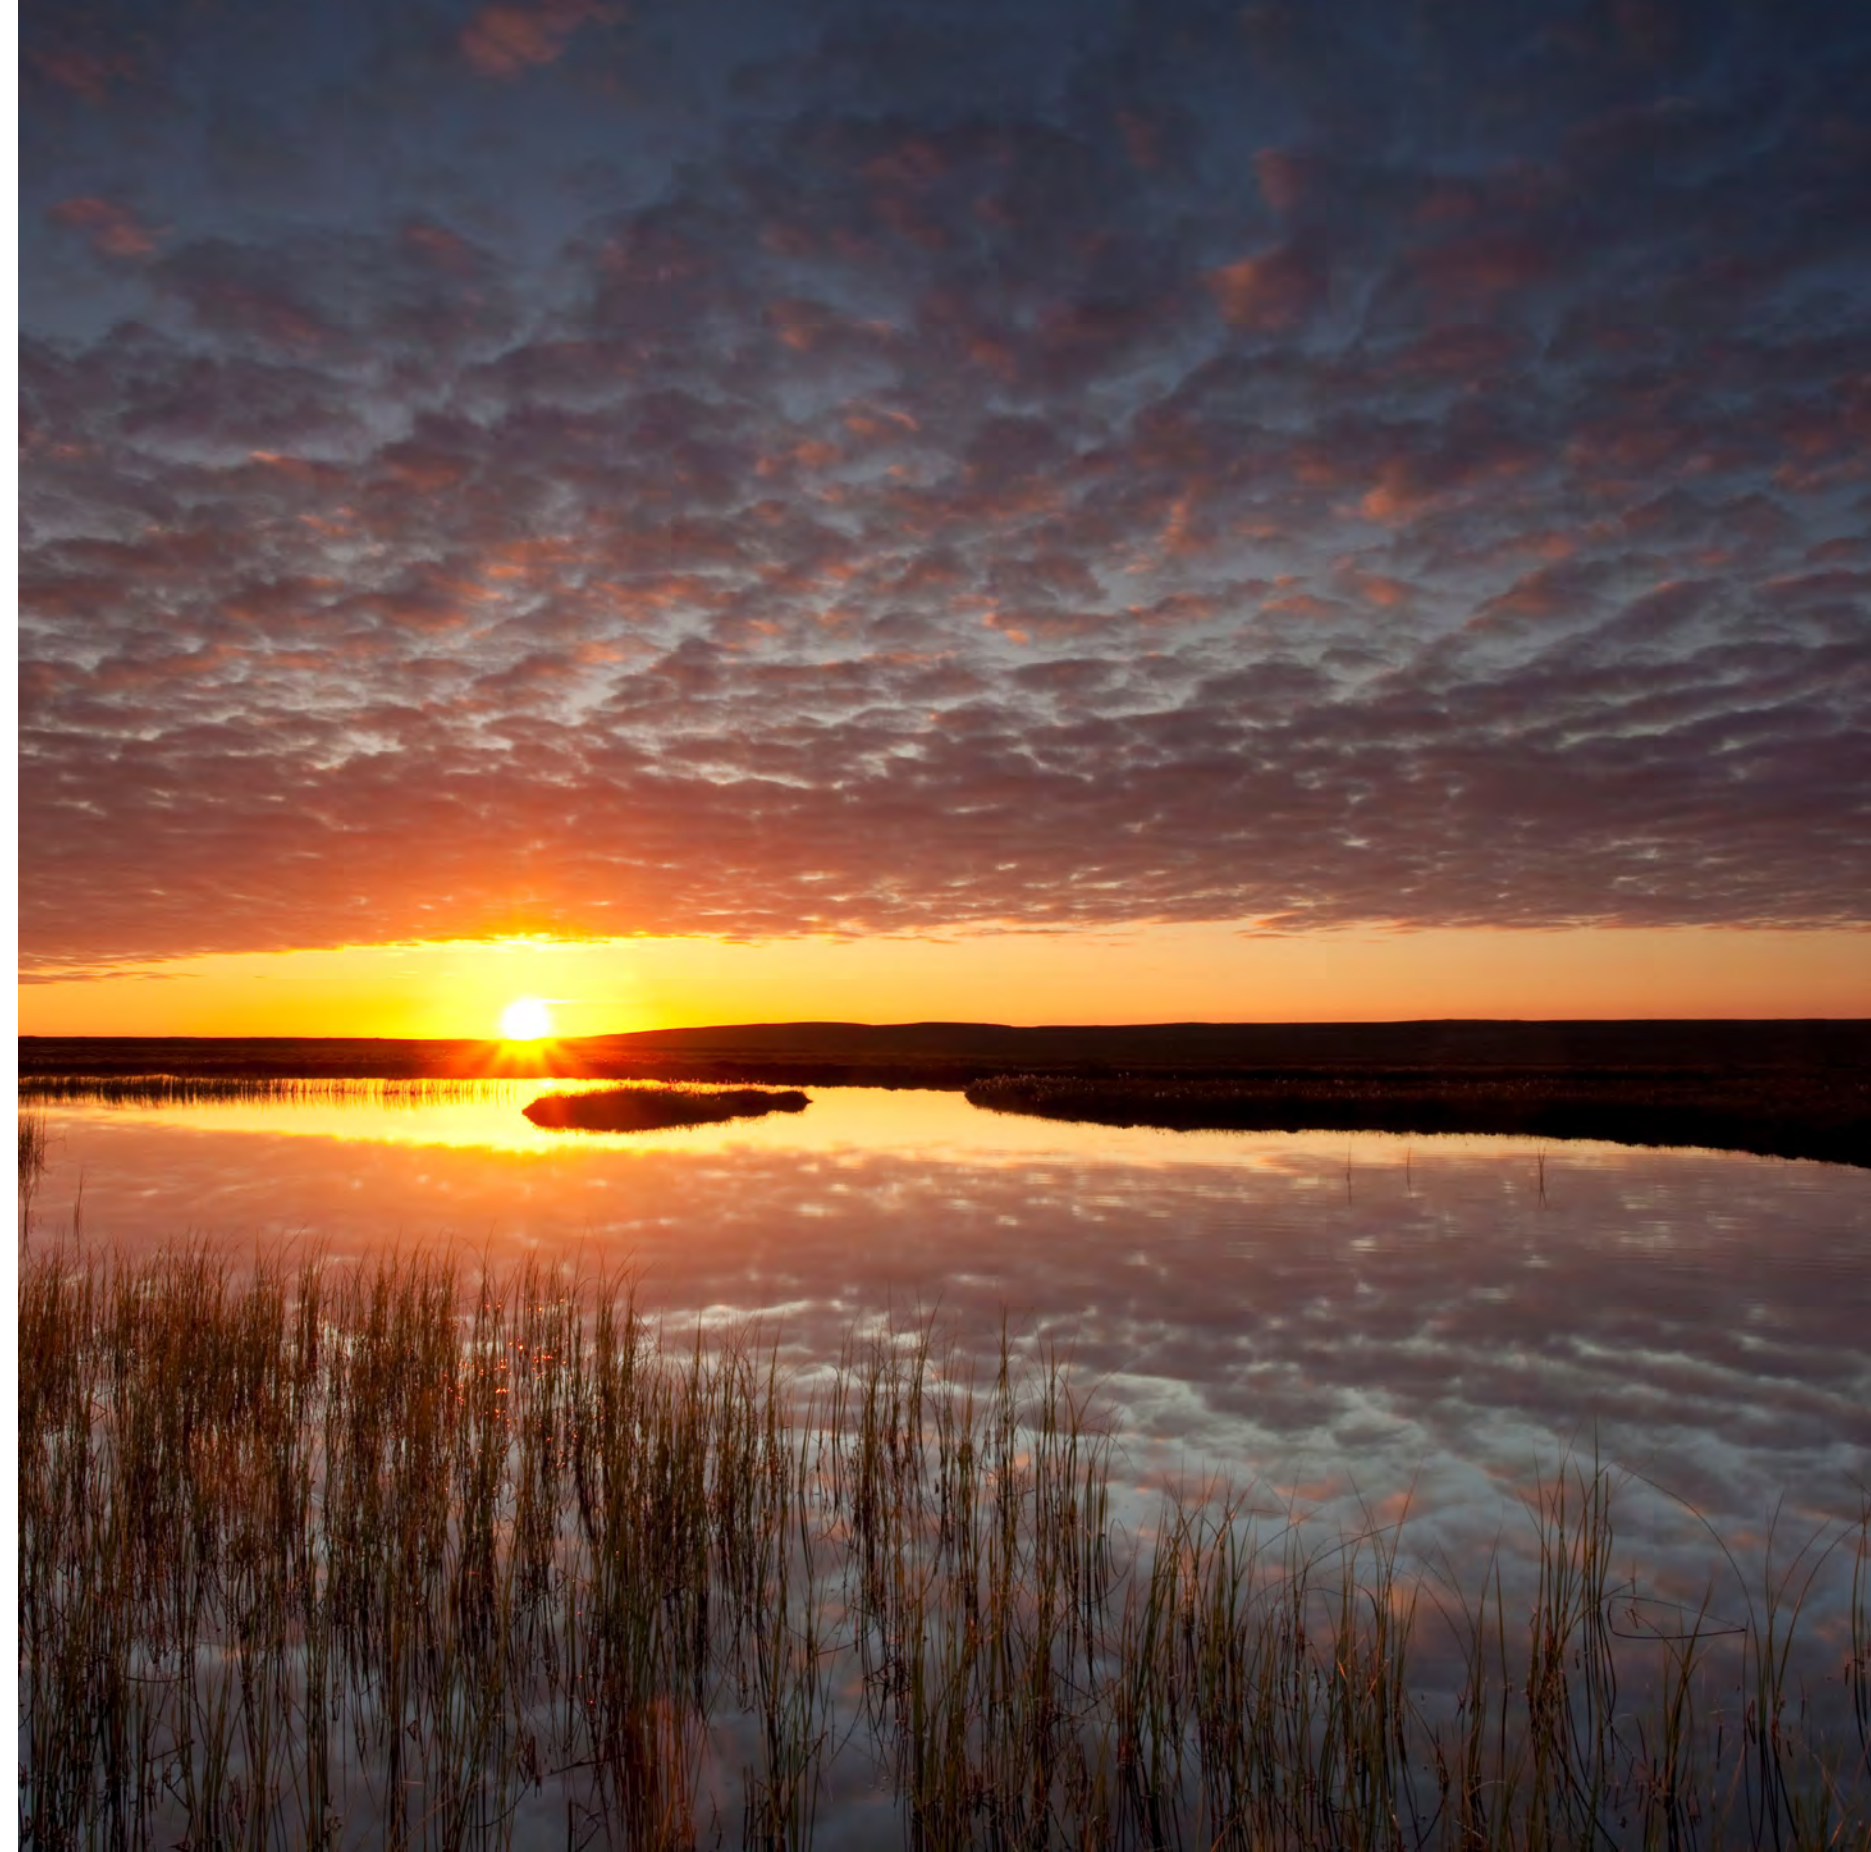

Imagine a Scotland where nature is reawakened and the spectre of climate breakdown isn't a constant worry for younger generations. Please consider a small investment to help us make more rewilding happen.

Thank you.

Peter Cairns, Executive Director
SCOTLAND: The Big Picture

Your contribution to rewilding will be directed to our **Northwoods Rewilding Fund**.
