

NORTHWOODS

REWILDING NETWORK

IMPACT 2021-2023

MORE NATIVE WOODLAND

168,980
native trees planted
over 262 hectares
= **402 football pitches**

199 seed islands
established

1,081 hectares
set aside for natural
tree regeneration

MORE SPACE FOR WATER

234
new ponds and other
wetland features created
= **76 olympic-sized
swimming pools**

90 hectares
of peatland
restored

WILDER RIVERS

1,725 m
of watercourses
re-naturalised

55
leaky dams
installed

JOINED-UP HABITATS

Over **16 km**
of new hedgerows
planted

Over **18 km**
of redundant
fencing removed

384 hectares
of new grassland
habitat created that
was previously
intensively farmed

RETURN MISSING SPECIES

14 beavers
released across
the network

Great crested newts
translocated to one site

Wildcats
reported at 3 sites

Northern damselfly
recolonised one site following
habitat enhancement

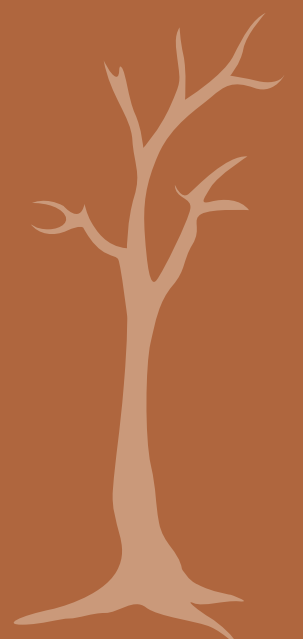

LET NATURE LEAD

68.5%
of partners worked
to increase dead wood

98%
of partners reported
the presence of at least
one mammalian predator

100%
of sites reported
at least one
avian predator

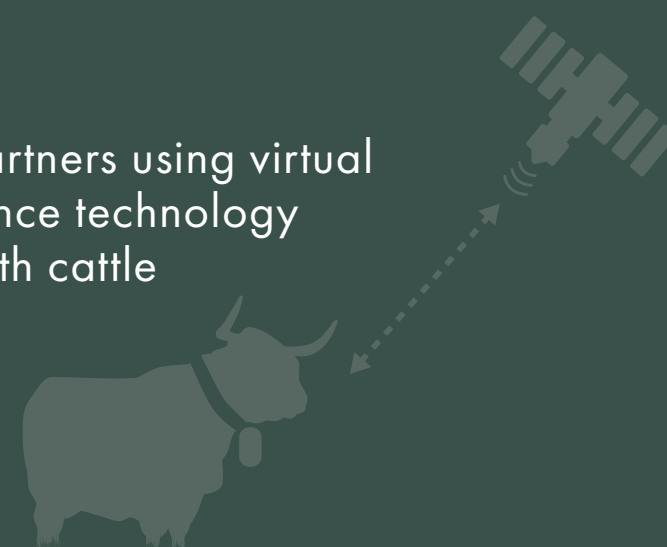

REINSTATE NATURAL GRAZING

202
native cattle grazing
the network

24
native horses and ponies
grazing the network

2
partners using virtual
fence technology
with cattle

CONNECT WITH COMMUNITIES

212 visitor events were
attended by **6,689 people**

522,616
visitors attended partner sites

9 partners hosted people from
under-represented groups

50% of partners hosted
educational events

20% of network sites are
run by community groups

CREATE REWILDING BUSINESS

28 nature-related
enterprises **currently
employ 72.7 people**
(FTE) across the network

Over
2 million pounds
spent with local suppliers
and service providers
